Tools & Technologies: Git, React, AWS (S3, CloudFront, Certificate Manager), Google Analytics, Microsoft Visual Studio, Heroku, Jira, Microsoft Azure, Snowflake, Figma, Maven, pgAdmin, VirtualBox, Ableton, Max/MSP, Pro Tools

EXPERIENCE

Lead Audio Engineer & International Communications

March 2025 – March 2026

Rhythmedia Inc.

Tokyo, Japan

- Engineered and recorded for studio sessions with artists including The Alchemist, MISIA, and DJ MURO, handling microphone setup, session files, cue mixes, and DAW routing (Pro Tools, Ableton Live).
- Spearheaded international project coordination for a collaboration between a multi-platinum Japanese artist and a Grammy-winning US artist, serving as the primary liaison between executive leadership and senior talent management.
- Handled music / audio editing, mastering prep, and restoration by utilizing tools such as iZotope RX, Pro Tools, and Ableton Live, featured in Billboard Magazine, Shibuya Crossing, social media, television, and radio.
- Recorded and produced audio for 4 commercials with clients including Lawson, J-Wave, and Koikeya, ensuring broadcast-quality sound and reduced standard post-production time by 50%.
- Developed a timecode sync VST using C++ and the JUCE framework, enabling consistent cross-DAW time alignment and improving studio workflow efficiency by 66%.

Site Reliability Engineer

February 2022 – July 2022

State Street Corporation

Boston, MA

- Engaged in daily Scrum meetings and automated manual operational tasks, exceeding \$500,000 in cost savings.
- Enhanced application reliability by 180% by proactively analyzing system performance with Dynatrace and Splunk to detect and address anomalies.

PROJECTS

Konac | Ableton, Pro Tools, FL Studio, Photoshop

April 2015 – Present

- Founded and managed independent music project Konac, producing original music and overseeing all creative and production aspects.
- Negotiated and finalized recording contracts with executives at premier labels including NoCopyrightSounds, securing global distribution rights for original music released under the artist brand.
- Garnered over 15 million independent streams and over 100 million streams across platforms, reflecting significant audience engagement and reach.

taoseto.com | JavaScript, HTML, CSS, Bootstrap, React, AWS

December 2024 – Present

- Elevated user experience by developing a full-stack, responsive single-page application (SPA) using React and JavaScript to showcase professional experience, projects, and contact information.
- Improved site reliability and load times by configuring AWS CloudFront and S3 for global content delivery, with secure HTTPS enabled through Certificate Manager.

YouTube Audio Transcriber | Python, Whisper, pytube, SpeechRecognition, Git

October 2024

- Built an AI transcription tool with pytube and OpenAI's Whisper to extract and transcribe YouTube audio, enabling quick search and indexing of long-form video content.

Valolytics | Python, selectolax, requests, Git

December 2023 – June 2025

- Designed and maintained a comprehensive Esports match analysis tool for the game VALORANT.
- Developing and building on advanced ELO rating functions, including K-factor calculation with decay factors and dynamic adjustments for map-specific performance, enhancing the precision of team ratings by 250%.
- Improved data accessibility by aggregating team statistics such as total maps played, win rates, and ELOs.
